

## CouplesInBloom.com – Organic Christianity

December 2015

Food currently labeled ‘**organic**’ in the USA was how food always was, until recently. Industrialization of the food industry found it expedient to compromise food quality for the ultimate goal of financial productivity. Without addressing that topic, its associated long-term health problems are becoming increasingly realized and better food options are becoming more available. *Unnatural compromise* has invaded far more than mere food.

Compromise is an important Bible topic, as it is pivotal to the workings of evil. Areas of compromise that currently empower two evil strongholds in many Christian lives are: 1) *religiosity and Gnosticism are believed to be Christianity*, and 2) *laziness and disobedience are rampant in Christianity*. The value in investigating these unnatural compromises is freedom from them, and freedom into organic, Biblical Christian growth.

Everything God created was “good” ⇨ Genesis 1, and people He created in His image were “very good” ⇨ Genesis 1:31. Unlike the rest of creation, people were made in God’s image, were given a free will, and instructions for using it. When people chose to abuse it ⇨ Genesis 3 & 6, God was cut to the heart ⇨ Genesis 6:6, yet always kept a way available for people to be forgiven and therefore able to stay in good relationship with Him ⇨ Romans 5:20. In every aspect, these choices remain available to us to this day.

As predicted, many people are waxing cold ⇨ Matthew 24:12... due to their choices against God. Yet, and greater, relationship with God improves all the time for all who stick with Him. This original ‘**organic**’ intimate life *is* Christianity defined, and includes:

- **Prayer:** **authenticates** the significance of God within us as we interact with Him.
- **Relationship:** sowing intimacy with God **earns** a life of reaping unity with Him.
- **Discipleship:** learning the ways of God **superimposes** His heart into our heart.
- **Maturity:** our life, changed by God, **reproduces** / makes disciples of those around us.

As with food, the *unnatural compromise* of Christianity makes it *inorganic* / unhealthy:

- 1) *Religiosity and Gnosticism are believed to be Christianity*: Religiosity is a false form of Christianity ⇨ 2 Timothy 3:1-5; and Gnosticism is an Oriental-originated philosophy supported by Plato and Pythagoras whose incorrect theology denies Biblical physical resurrection of Jesus and Christians ⇨ 2 Timothy 3:5... fabricating a ‘spirit-only’ realm.
- 2) *Laziness and disobedience are rampant in Christianity*: the aforementioned denial of God’s power breeds false license to self-justify non-authenticated *non-participation* with God, contradicting the Bible definition that **intimacy** with God is central to Christianity.

These two false comforts have many people missing the primary call of Christianity to follow Christ and be “**a friend of sinners**” ⇨ Luke 7:34. Thus, our planet is late in being evangelized... simply due to people **not sharing God’s love**; *not* due to any other reason.

Religiosity, Gnosticism, laziness, disobedience, and other self-indictable excuses will **not** be excused by God ⇨ Romans 1:20, so it is **vital** that we examine ourselves today to change while there is still time; and then mature to reach others. This *is* Christianity.

Quit the victimization of compromise; **organic Christianity** is waiting for you! ❤
